SUMMARY OF COMPANY PROFILE

At **Neelbert Innotech**, we believe technology is more than just code—it's the foundation of modern business success. In today's fast-moving digital world, standing out requires more than a good website; it demands a **complete, intelligent digital ecosystem**.

We specialize in crafting **visually stunning, high-performance websites** that elevate your brand identity and set new benchmarks for innovation. But our expertise doesn't stop at design. We engineer end-to-end digital solutions tailored to your business goals—combining **clean aesthetics, powerful functionality, and measurable results**.

From **advanced SEO strategies** that boost visibility to **data-driven advertising campaigns** that attract the right audience, we ensure your brand is not only found—but remembered and engaged with meaningfully.

Our comprehensive IT and digital services help:

- Streamline operations
- Strengthen security
- Build scalable, future-ready infrastructure

Introduction:-

About Neelbert Innotech is a premier IT consulting and services firm dedicated to delivering excellence in technology. Founded on the principles of innovation and integrity, we specialize in helping businesses navigate the complexities of the digital world. Our team combines deep technical expertise with a client-first approach to ensure that every solution we deliver is perfectly aligned with your business goals.

Why Choose Us:- We don't just build websites—we create digital assets. With expertise in UAV training, we deliver authority-driven, safety-focused, tech-forward websites in just 15 days.

- **End-to-End Expertise:** From hardware setup to custom software development, we handle it all.
- **Innovation-Driven:** We use the latest tech stacks to ensure your business stays ahead of the competition.
- **Security-First Mindset:** Data protection is integrated into every layer of our service.
- **Dedicated Support:** We provide proactive maintenance and rapid-response technical assistance.

OUR SERVICES

1. **Web & Digital Presence**
   - **Website Development:** Professional, responsive, and SEO-friendly websites.
   - **Web Portals Development:** Custom-built portals for internal or external business use.
   - **E-Commerce Development:** Fully functional online stores with secure payment gateways.
   - **Education Portals:** Specialized platforms for schools, colleges, and online learning.
   - **Domain & Hosting Services:** Reliable hosting and domain registration for 99.9% uptime.
2. **Mobile & App Solutions**
   - **Android Application Development:** Native apps optimized for the Android ecosystem.
   - **Mobile Apps Development:** Cross-platform (iOS/Android) mobile solutions.
   - **MLM Website & App Development:** Specialized systems for multi-level marketing businesses.
   - **Tournament & Contest Apps:** Engaging platforms for gaming, sports, or corporate contests.
3. **Enterprise Software & Business Automation**
   - **Software Development:** Custom software built to solve specific business problems.
   - **ERP & CRM Development:** Integrated systems to manage resources and customer relationships.

- **Desktop Software Development:** Powerful offline applications for Windows and macOS.
- **Billing & Examination Software:** Automated tools for retail billing and educational testing.

4. Industry-Specific Smart Solutions

- **On-Demand Apps:** Taxi Booking, Food Delivery, and Service Provider applications.
- **Management Systems:**
  - School & Hotel Management Software
  - Hospital & Pathology Software
  - Real Estate Management Software
- **Small Business Software:** Affordable, high-impact tools designed for growing companies.

5. Creative & Design Services

- **Graphics Designing:** Professional visual assets for your brand identity.
- **Logo & Banner Designing:** Unique logos and high-conversion marketing banners.
- **Promotional Video:** High-quality videos to explain products and attract customers.

6. Digital Marketing & Content Strategy

- **Digital Marketing:** SEO, Social Media Management, and lead generation campaigns.
- **Content Writing:** Professional copywriting for websites, blogs, and marketing materials.

Multi-Client Loyalty & Rewards

1. Project Overview:-

This proposal outlines the development of a multi-tenant loyalty and rewards web application that enables multiple clients to operate under a single core platform using subdomain architecture. Each client will have customizable branding, rewards configuration, and feature control while maintaining a unified UI/UX system.

2. Target Users

- Normal Customer:

1. • No login required
2. • Scan QR code
3. • Instant cashback redemption

- Sales Person:

4. • Mobile OTP login
5. • Scan QR codes
6. • Earn and redeem loyalty points

3. Multi-Tenant Architecture

• Subdomain-based client access (client.domain.com)
• Tenant-specific branding (logo, colors, configuration)

- Configuration fetched dynamically via API
- Multi-tenant database schema using tenant_id separation

4. Application Modules

Login Page – Mobile number and OTP verification
Home Dashboard – Total points, redeemable points, last scan details
Redeem Category Page – Cash, White Goods, Gift Cards, Electronics, Beauty, Holidays
Cart Page – Reward selection and confirmation
Profile Page – User details and compliance information
History Page – QR scan and redemption history

5. Cash Payment Module

- UPI ID entry and validation
- Cashback redemption processing
- Transaction status tracking
- Admin-side settlement tracking

6. Non-Functional Requirements

- Mobile-first responsive design
- Secure OTP authentication
- High performance and scalability
- Secure API endpoints
- Rate limiting and validation

7. 2-Week Development Plan

Week 1:
Day 1–2: Architecture setup and database design
Day 3: OTP authentication implementation
Day 4: QR generation and validation system
Day 5: Sales dashboard development
Day 6–7: Rewards and cart system development

Week 2:
Day 8: UPI cashback module
Day 9: Admin panel setup
Day 10: Multi-client branding configuration
Day 11: Profile and compliance module
Day 12: Testing and optimization
Day 13: Deployment and SSL setup
Day 14: Final QA and handover

Cost Breakdown

Frontend Development – ₹8,000
Backend Development – ₹7,000
Multi-Tenant Architecture – ₹3,000
QR & Points Logic – ₹2,000
Payment Module – ₹2,000
Admin Panel – ₹2,000
Testing & Deployment – ₹1,000
Total Project Cost – ₹25,000
